

to \$800 per hours. I have he said in this article that the contract would amount to somewhere between \$8,000 and \$20,000 and I have believe received at the present time \$11,600 on this contract and I have earned every damn cent of it, and if Mr. Simmons or any other member of the press wants to ride the right hand seat of the helicopter while I hover over those power lines 30 feet above the power lines, a 140 feet above the ground at 4 or 5 miles per hour he is damn well welcome to sit with me and let him be the judge as to whether it is worth \$100 or a \$1,000 per hour. All of you will remember 3 years ago when my company and I myself after the state of Nebraska, the Federal Government, the Civil Defense refused to get off of their dead rear end and protect the people of my community a when an ice jam blocked the Platte River that my firm did so when I refused to accept the mediocre payment pauper by the federal government in spite of the fact that they wasted seven and a half million dollars up there and I still have not been paid for the job and I will not take the kid of money that they offered me for it. I will work for nothing, but I will not let someone who can not even fly a kite set a value on the services that I perform. I would like to go a little bit further. In bold type it says by coincidence Schmit last week submitted a proposed amendment to LB656. I'll let you be the judge if it is coincidence or not. I'll let the members of this body be the judge, of whether or not they think that I as a member of this body benefit from my service in this body through a contract with any other firm. The nature of my work which is one in which many cases I do business with sub-divisions of government. Many of you represent the city of Omaha, a long while ago I held contracts with the city of Omaha in excess of \$800 per hour. In excess of \$800 per hour, for work of my company. I have been paid in excess of a thousand dollars an hour by people who felt the work was well worth it. I do not intend to try and intimidate any member of the press, that is impossible, but I want to say this, that if any member of the press at any time today, tomorrow or in the future has any questions about any of my business' and my operations I would hope that they would approach me openly and above board. I have always been proud of my operations and I continue to be so. For anyone to imply that my contract has an a...a...is anything but an honorable contract is a damn lie. The man who said so is a damned liar. I challenge him to prove it otherwise.

CLERK: Unanimous consent request to bracket 705 for consideration on March 26th, signed Senator Chambers.

PRESIDENT: Senator Chambers do you want to take up the motion? He's not here, lay it over for just a minute, maybe he will be back.

CLERK: Read unanimous consent motion from Senator Waldron regarding LB651.

PRESIDENT: Senator Waldron in the chamber for his motion? You can speak from there Senator if you want too.

SENATOR WALDRON: Mr. President, members of the legislature, I would like to unbracket the bill. It is Senator DeCamp's bill dealing with daylight savings time. Bring it up for discussion on next Tuesday. The amendment that I am going to offer for the bill will be putting the effective date of the bill December 1, of this year, which means that we will not have
